PROJECTS

Student Management System 2024

Technologies: Core Java, Java Servlets, JSP, MySQL, JDBC, Apache Tomcat, HTML, CSS

- Designed and developed a full-stack web application to manage student records with complete CRUD operations — Create, Read, Update, and Delete — using Java Servlets and JSP.
- Implemented MVC architecture with Java Servlets as the controller, JSP as the view layer, and MySQL as the backend database connected via JDBC.
- Built a user-friendly front-end interface using HTML5 and CSS3; deployed the application on Apache Tomcat server for local testing and demonstration.
- Designed normalized MySQL database schema ensuring data integrity; application capable of managing 100+ student records efficiently through a single web interface.
